

Q1 & Q2 - 2024: Wind Energy Planning Dashboard

Key Messages:

- 1: Only a quarter of what we need** for the 2030 targets approved by An Bord Pleanála in the first half of the year.
- 2: Decision-making timelines for the Board have improved.** Twelve decisions in Q1 & Q2 2024 compared with three for the same period in 2023.
- 3: Refusal rate of projects in An Bord Pleanála has increased significantly** due to anti-wind County Development Plans.

Target:

To deliver the Climate Action Plan our combined target for Q1 and Q2 2024 was:

860 MW

All of these projects are either direct applications to An Bord Pleanála, classed as strategic infrastructure, or have been appealed to An Bord Pleanála following a decision by the local authority. Decisions made by County Councils are not included and nor are decisions on amendments to approved wind energy projects.
