

About WindEurope Annual Event 2024

Jointly hosted by the Irish Government and Wind Energy Ireland, the Ireland Pavilion will showcase Ireland's enormous wind energy potential at WindEurope's Annual event across 20-22 March.

We are a world leader in onshore wind energy and in the integration of renewable power. We have some of the best offshore wind resources on the planet. Our first offshore projects are in the planning system, and we have dates for upcoming offshore and onshore auctions.

We have a Government committed to Ireland's clean energy future and an industry determined to deliver it.

Ireland is a huge opportunity for investors and the supply-chain, arguably the best untapped offshore wind resource in the world with a skilled workforce, decades of experience in onshore energy and a supportive policy framework.

The industry with every link in the value chain, and from across Europe will be in Bilbao from 20-22 March 2024. You can expect 10,000+ visitors to walk through the doors of the Bilbao Exhibition Centre over the course of the three days. And over 400 companies on the exhibition floor will be ready to reach out, do business and showcase their latest products to the entire sector.

This is your chance to join the Ireland Pavilion and be part of their success story.
