

Research Vision Statement

To realise the potential presented to Wind Energy Ireland by research, to support the longer-term ambition of a zero-carbon society.

Research Pillars

POLICY PRIMING

This pillar of the strategy focuses on research that is undertaken by WEI and our partners in key policy areas. Success is measured by the quality of our research content, focused on the priorities of members and overall goals of our industry.

Policy & Funding Alignment
Sweet Spot

FUNDING FIRST

This pillar of the strategy focuses on opportunities to participate in collaborative projects, getting funding awarded to WEI as a partner in the co-production of leading energy research. Success is measured by the funding awarded to WEI, in return for the insights and services we can offer to our partners.

Strategic Goals

STRATEGY GOAL 1

Position leading energy research at the centre of national policy formation and trends.

STRATEGY GOAL 2

Establish WEI as a collaborative partner in the co-production of grant funded research.

STRATEGY GOAL 3

Connect energy research with education and engagement, driving positive actions by us, our supporters, and society.

STRATEGY GOAL 4

Support our members, using research to innovate and deliver the skills needs of a growing sector.

Building a zero-carbon electricity system - Develop policy that is rooted in research

Building a stronger Wind Energy Ireland - Diversify our revenue through research funding

Building powerful communities - Educate and engage people using research

Building our members capabilities - Support our members to develop and grow
